

Our client, D B Schenker was working in partnership with a global EPCM, Bechtel.

### **57 x 40 DV CW ex Singapore – Batam Indonesia**

The requirement was to supply two batches of 40 DV's in Batam, Indonesia. The first requirement was for 40 x 40 DV and the second was for an additional 17 x 40 DV. As Batam is only located 12 miles from Singapore, we supplied units ex depot Singapore to be put on small barge to Batam, approx. 10 units at a time. All units were required to conform to Australian Quarantine and Inspection Service (AQIS) standards to protect Australia's favorable biohazard status.

We released units in 4 batches of 10 x 40 DV, 1 batch of 11 x 40 DV and final batch of 6 x 40 DV, in order to assist with the barge schedule. This also assisted with D B Schenkers cash flow, as units were invoiced in batches of 10 as released.

### **24 x 40 DV CW ex Thailand**

The requirement was to supply two batches of 40 DV's in Thailand. The first requirement was for 20 x 40 DV and the second was for an additional 4 x 40 DV. All units were required to conform to Australian Quarantine and Inspection Service (AQIS) standards to protect Australia's favorable biohazard status.

We supplied these units out of Laem Cha Bang. Ease of order fulfillment was assured through our global pricing and agreed credit terms.
