

70 x 40 HC CW ex Boston Area

The requirement was to supply 70 x 40 HC in CW condition in the Boston Area.

These units were to be supplied starting in November 2015, picking up 15-20 per month. The closest SOC location was Newark / New Jersey, so units were supplied ex depot New Jersey.

Once the order was confirmed, the pick-up schedule changed to weekly batches of approx. 8-14 units.

The overall requirement reduced to 48 x 40 HC's. Due to our flexibility and invoicing once units are picked up, K+N had the ability to alter their requirement with no financial impact.
