

### **28 x 40 DV Augusta, GA**

IGLU worked with the Houston team to supply four groups of 7 x 40 DV's out of Savannah for their requirement in Augusta, GA. These units were supplied over the course of four months. The first three batches were supplied as 7 x 40 DV's, however the final batch was reduced to 3 x 40 DV and 1 x 20 DV due to project requirements.

Our organization is able to adapt to these changes due to our flexible approach. Units were not invoiced until picked-up, giving Panalpina the ability to change the quantities and equipment types due to project requirements.

### **4 x 40 DV Kansas City**

IGLU worked with the Houston team to supply four groups of 1 x 40 DV out of Kansas City for their requirement in Emporia, KS. These units were supplied over the course of four months. The first two batches were supplied out of Kansas City as requested, however the third batch was switched to Savannah, and the last batch switched back to Kansas City.

Due to our organization being able to adapt to these changes, it allowed Panalpina to meet the project requirements.
